PROFESSIONAL SUMMARY

Cloud and DevOps engineer with a software development background (React.js, Node.js, REST APIs) and hands-on AWS practice across EC2, S3, EBS, VPC, IAM and Security Groups. Experienced in Jenkins CI/CD pipelines, Docker, Terraform and Linux server administration. Developed real-world projects including a Jenkins Pipeline to build and deploy a Java web application to Tomcat, infrastructure automation with Terraform and a system-state monitoring tool. Brings API testing, troubleshooting and problem-solving experience.

TECHNICAL SKILLS

Cloud	:	AWS EC2, S3, EBS, IAM, VPC, subnets, route tables, Internet Gateway, Security Groups
Linux & Scripting	:	Linux administration, SSH, file management, permissions, processes, storage, networking, Bash/shell scripting
DevOps & IaC	:	Git, GitHub, Jenkins, Maven, Ansible, Docker, Terraform, GitHub Actions, CI/CD
Containers & Orchestration	:	Docker, Kubernetes (basic), Helm (basic)
Monitoring & Logging	:	Grafana (basic), Prometheus (basic)
AI Tools	:	Generative AI, ChatGPT, GitHub Copilot, AI-assisted coding and troubleshooting
Programming	:	Python, JavaScript, TypeScript, Node.js, Express.js
Web & APIs	:	React.js, HTML5, CSS3, REST APIs, Postman, Swagger
Databases/Tools	:	SQLite, PostgreSQL, JIRA, VS Code, Git Bash, WSL Ubuntu

PROFESSIONAL EXPERIENCE

Indpro AB — Software Developer / Trainee Engineer May 2022 – Feb 2023

- Developed and maintained web application features using React.js, JavaScript/TypeScript, Node.js and Express.js.
- Developed and integrated REST APIs; investigated frontend, backend and API issues during development and testing.
- Used Postman and Swagger to validate API behavior and investigate integration issues.
- Tracked defects in JIRA, reproduced issues, collaborated with developers and verified fixes.
- Worked in Agile/Scrum and performed browser-based testing and troubleshooting.

Freelance Web Developer — Paathshala Ascension Mar 2023 – May 2023

- Developed and updated website functionality using HTML, CSS and JavaScript.
- Investigated UI and functional issues and implemented required fixes.

TRAINING

Besant Technologies — AWS & DevOps Trainee Jul 2026 – Present | Bengaluru

- AWS training completed; Linux and Python ongoing. Practiced EC2, S3, EBS, IAM, VPC, Security Groups and SSH.
- Built Terraform labs and practiced Git/GitHub, Docker and CI/CD workflows.

PROJECTS

Student Result Application — Jenkins Pipeline CI/CD | Jenkins, Maven, Tomcat, Git, Java

- Created a Jenkins Pipeline with Jenkinsfile stored in GitHub to automate build and deployment.
- Used Maven to build a Java web application (WAR file) and archived artifacts in Jenkins.
- Deployed the application to Tomcat on an EC2 instance. Troubleshot and fixed Tomcat deployment permission issues.

Dockerized Website CI/CD | Docker, GitHub Actions, AWS ECR, EC2

- Containerized a static website with Docker and configured GitHub Actions to build and push the image to Amazon ECR.
- Deployed the container on EC2 to practice automated build-and-deploy workflows.

AWS Infrastructure Provisioning with Terraform | Terraform, EC2, S3

- Defined AWS EC2 and S3 resources using Terraform. Practiced infrastructure-as-code instead of manual creation.
- Used init, plan and apply; worked with variables and state inspection, and reviewed Security Group access rules.

AWS EC2 Linux Web Server | EC2, Linux, Apache/httpd, EBS

- Launched a Linux EC2 instance, configured Apache/httpd and hosted an HTML page with HTTP access.
- Practiced SSH-based administration and troubleshooting, and attaching, formatting, mounting and unmounting EBS volumes.

InfraForensics — Infrastructure State & Incident Forensics | Python, psutil, SQLite

- In development: collects system-state snapshots for CPU, memory, disk usage, process count, hostname and timestamps using Python/psutil.
- Stores historical snapshots in SQLite, compares snapshots to identify differences and classifies changes by severity.

Smart Institute Attendance System | Python, Flask, SQLite

- Built a Flask attendance app with SQLite persistence to record and retrieve attendance data.
- Added duplicate-record prevention and network/IP-based restrictions to limit attendance access.

CareerBridge — Training & Placement Management | React, TypeScript, Node.js, Express, Prisma, SQLite

- Built a full-stack portal for students, batches, attendance, mock tests, interviews, companies and placement applications.
- Implemented React/TypeScript UI, Express REST APIs and Prisma/SQLite persistence with JWT authentication, bcrypt hashing and role-based authorization.

EDUCATION

B.Tech — Electronics & Communication Engineering, Sarala Birla University
Diploma — Electronics & Communication Engineering, BITT Polytechnic, Ranchi
